PVUNL

PATRATU AUXILIARY BOILER TECHNICAL SPECIFICATION FOR BOILER FEED WATER PUMP ENCLOSURE -2

GENERAL DATA SHEET

1. Project : PATRATU AUXILIARY BOILER

2. Customer : PVUNL

3. No.of Pumps : 2 Nos. (1 working + 1 standby)

Each pump shall be of 100% capacity

4. Type : Single Suction, Multi stage, Horizontal,

Centrifugal, motor driven, Ring section type

5. Location : Out door

6. Duty : Continuous, 100% duty

7. Fluid handled : Feed Water

8. a) Design flow capacity of one Pump
b) Normal flow capacity of one pump
b) Min. flow capacity of one pump
c) REFER PUMP DESIGN DATA
d) To be furnished by bidder

9. (i) Pressure values

a) Pump suction working pressure : 1.9* Kg/cm² (a)

b) Pump discharge working pressure : REFER PUMP DESIGN DATA

(ii) Connecting pipe sizes

a) Pipe size at pump suction : OD 168.3x7.11 mm b) Pipe size at pump discharge : OD 114.3x6.02 mm

c) Flanged Eccentric reducer/expander at both suction and discharge sizes to match the pump terminals with the connecting pipe sizes as indicated above are in pump vendor scope.

d) Counter flanges along with fixing nut, bolt & Non-asbestos Gaskets as applicable are in pump vendor scope

e) DPT shall be provided across each suction strainer along with root valves (24 V DC, 2 wire with HART Protocol, SMART type)

10. Specific gravity of feed water : 0.956

11. Temperature : 105° C

12. NPSH available : 7 M* of water column

13.0 Material of construction

13.1 Casing : ASTM A216WCB

13.2 Impeller : ASTM A743 CA6NM

13.3 Shaft : AISI 410

13.4 Wearing ring : ASTM A743 CA6NM

13.5 Base plate : MS fabricated

14.0 Nozzle orientation : Top suction/top discharge

* Suction strainer drop is not considered while arriving at Feed Pump Suction pressure, NPSH available.

PVUNL PATRATU AUXILIARY BOILER TECHNICAL SPECIFICATION FOR BOILER FEED WATER PUMP

PUMP DATA SHEET (To be filled and submitted by bidder)

1.0	Model and type	:
2.0	Quantity	:
3.0	Capacity	:
4.0	Total head	:
5.0	Suction pressure	:
6.0	Pump shut off head at cold Pump shut off head at hot	:
7.0	NPSH (pump) required	:
8.0	Fluid handled and Concentration	:
9.0	Operating temperature	:
10.0	Specific gravity of the fluid	:
11.0	Nominal speed (Pump speed and motor speed shall be specified separately in the datasheet)	:
12.0	Nominal power	:
13.0	Pump input power with Liquid at rated rpm	:
14.0	Pump efficiency (Mechanical and volumetric Efficiency shall be specified separately in the datasheet)	:
15.0	Motor rating	:
15.1	GD ² value	:
15.2	PUMP MINIMUM FLOW	:
15.3	Noise level	:
15.4	Vibration level as per IS12075	:
16.0	Pump construction	
	a. Casing	:
	b. No. of stages	:
	c. Packing	:

PVUNL PATRATU AUXILIARY BOILER TECHNICAL SPECIFICATION FOR BOILER FEED WATER PUMP

	e. Suction flange size, rating	:
	f. Discharge flange size and rating	:
	g. Flange standard	:
	h. Cooling water requirement	:
	i. Pump bearing type, position (Driven/Nondriven)	:
	j. Bearing lubrication	:
	k. Impeller diameter	:
17.0	Material of construction	
	a. Casing	:
	b. Impeller	:
	c. Stuffing box cover	:
	d. Shaft sleeve	:
	e. Shaft	:
	f. Wearing rings	:
	g. Base plate	:
18.0	Hydro test pressure of pump and testing standard	:
19.0	Weight schedule	
	a. Base pump	:
	b. Motor	:
	c. Base plate	:
	d. Pump motor assembly mounted on base plate along with coupling, strainer etc.	:
20.0	Companion flange suction/discha a. Size	arge :
	b. Type	:

d. Type of coupling
