- Notes** VTS = Vendor to specify
- Pump shall be as per ASME/ANSI B73.1 or equivalent.
 - Vendor to confirm the HP or kW of motors.
 - Pump shall be mounted on top of EDC vessels of and submerged down to the bottom of the vessel, Hence Total pump length shall be advised by Vendor. (Refer attached Typical installation diagram/sketch)
 - Vendor to advise number of stages of the pump
 - The suction lift of the pump shall be 5 meters
 - Vendor to provide Pump Base plate and Optional sub-base mounting detail.
 - Pump shall be equipped with inline strainer at the bottom.
 - Pump's motor and casing shall be explosion proof.
 - Vendor to provide information / literature regarding the pumps adequacy to handle petroleum fluids like Ethanol
 - Pump shall be running with variable frequency drive located at Motor control station (MCC)
 - Pumps shall be provided with a single mechanical seal. All seals shall be in compliance with API 682.
