**RADIANT HEATERS SPECIFICATION**

- This radiant heater is manufactured based on the EIKA technical specification ET-600  
- The product code interpretation is showed in the document "CODES SYSTEM FOR RADIANT HEATERS".
- The components are defined in the correspondent material list.
- The radiant heater should be pressed firmly against the glass ceramic surface with a spring presure of 10±5N.
- After assembling the heater should not move with respect to the glass ceramic plate

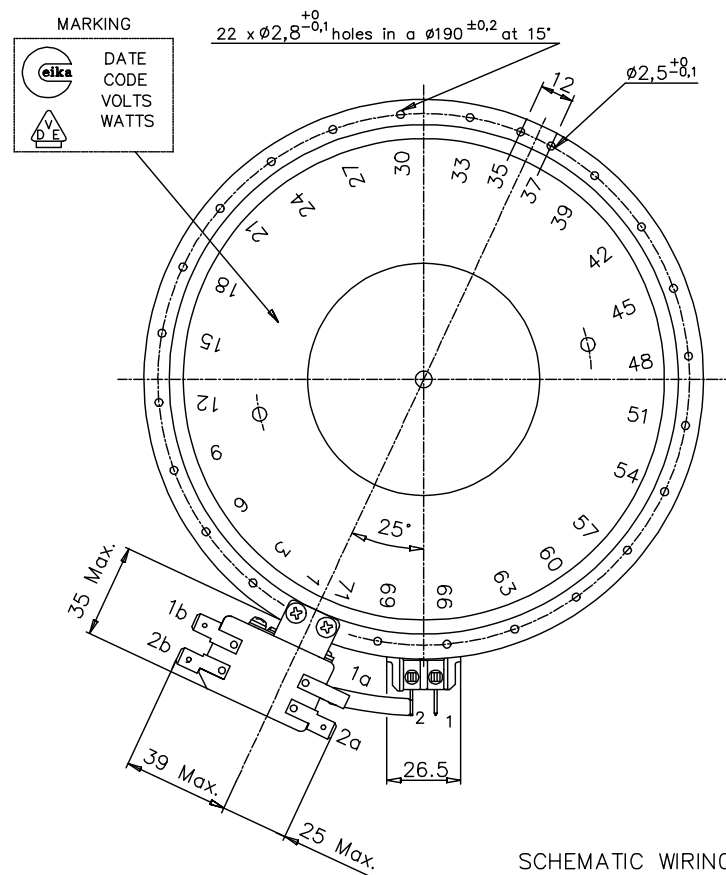

TERMINAL TYPES (Scrap view on S)

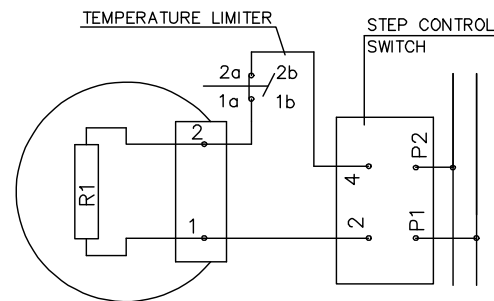

SINGLE RADIAL

VOLTS	WATTS	CODE	T°
230	1700	2002032812	560
240	1700	2002042812	560
400	1700	2002062812	560

### SCHEMATIC WIRING DIAGRAM

技术要求:

1. 未经客户同意,不得变更材质,结构,颜色等技术规格。
2. 未注明事项,依照双方协定的标准样品执行。
3. 符合ROHS环保要求,不得使用有害物质。
4. 未注明公差,依照公差表“中等”选取。
