RADIANT HEATERS ESPECIFICATION

- This radiant heater is manufactured based on the EIKA tecnical especification ET–600
- The product code interpretation is showed in the document "CODES SYSTEM FOR RADIANT HEATERS".
- The components are defined in the correspondent material list.
- The radiant heater should be pressed firmly against the glass ceramic surface with a spring presure of 10±5N.
- After assembling the heater should not move with respect to the glass ceremic plate

技术要求：

1.未经客户同意，不得变更材质，结构，颜色等技术规格。

2.未注明事项，依照双方协定的标准样品执行。

3.符合ROHS环保要求，不得使用有害物质。

4.未注明公差，依照公差表“中等”选取。
